SOURCE: 1970 Census of Population, Second and Fourth Count Summary Tapes. \*Note: the Spanish American figures are the result of a 15 percent sample while the other groups' figures are from 100 percent counts. The Spanish American total for Los Angeles County includes 60,716 non-white persons. In order to derive white totals which exclude Spanish Americans, the unadjusted Spanish American counts were subtracted from the white figures. Thus, the white populations will have a tendency to be low.
